// LP CHECKLIST

What LPs Should Ask Their GPs About AI Diligence

Seven questions that separate a defensible process from an expensive summary engine.

NONE OF THEM NEEDS A TECHNICAL BACKGROUND

ASKODIN.APP/INSIGHTS

askOdin

// QUESTION 01 OF 07

What standard does your diligence apply?

A GOOD ANSWER

It names the tests a claim must pass before anyone relies on it.

A WEAK ANSWER

“We use AI to be more efficient.” A process, with no standard named.

askOdin

// QUESTION 02 OF 07

Can you show me the reasoning behind a conclusion?

A GOOD ANSWER

Every claim traces to a source document, and contradictions are named.

A WEAK ANSWER

A summary with no traceability. The reasoning felt right. The model said so.

askOdin

// 03 OF 07 · THE MOST IMPORTANT

What happens when a claim fails the test?

A GOOD ANSWER

The system flags the violation and stops. It does not smooth it over.

A WEAK ANSWER

“It summarizes the data room.” Summarization hides contradictions.

askOdin

// QUESTION 04 OF 07

Where does the deal data go?

A GOOD ANSWER

Named subprocessors, a stated retention window, no training, a written policy.

A WEAK ANSWER

“It’s all secure.” “We use a leading provider.” Vagueness is not a security posture.

askOdin

// QUESTION 05 OF 07

Who is accountable for the output?

A GOOD ANSWER

A named partner signs off, with the reasoning trail attached.

A WEAK ANSWER

“The team reviews it.” Nobody named, no signature required.

askOdin

// QUESTION 06 OF 07

Is the verdict reproducible?

A GOOD ANSWER

Same documents, same verdict, months later.

A WEAK ANSWER

“A human always makes the final call.” That avoids the question.

askOdin

// QUESTION 07 OF 07

Can you show me a real audit?

A GOOD ANSWER

A redacted reasoning trail from the fund's own pipeline, not a vendor demo.

A WEAK ANSWER

An explanation of why they cannot share one.

askOdin

// AN INDEFENSIBLE PROCESS

Their judgment might be excellent.

You have no way to know.
